

Computer Vision 2019 Fall

Homework #8

Description

This homework focuses on generating noisy images and removing noise from images.

Results

Gaussian noise image with amplitude 10

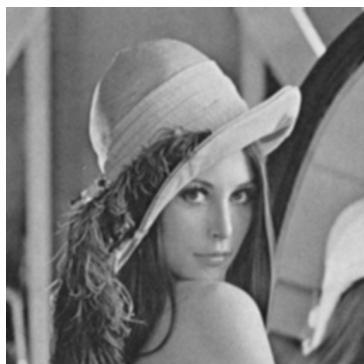

noisy image

SNR = 13.938

3x3 box filter

SNR = 17.828

5x5 box filter

SNR = 14.869

3x3 median filter

SNR = 17.907

5x5 median filter

SNR = 16.074

open then close

SNR = 8.572

close then open

SNR = 7.652

Gaussian noise image with amplitude 30

noisy image

SNR = 4.290

3x3 box filter

SNR = 12.688

5x5 box filter

SNR = 13.349

3x3 median filter

SNR = 11.314

5x5 median filter

SNR = 13.077

open then close

SNR = 8.588

close then open

SNR = 6.065

Salt-and-pepper noise image with probability 0.1

noisy image
SNR = -2.106

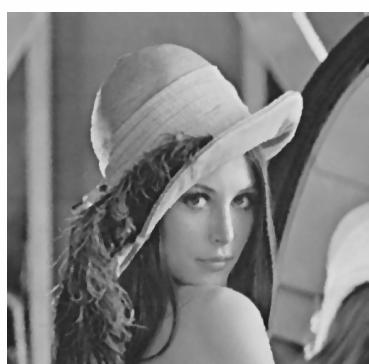

3x3 box filter
SNR = 6.342

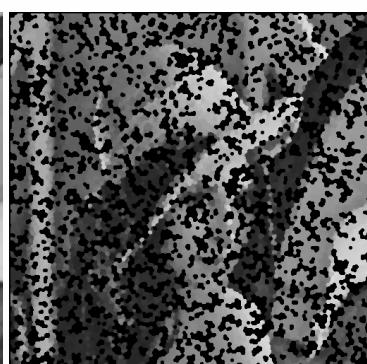

5x5 box filter
SNR = 8.523

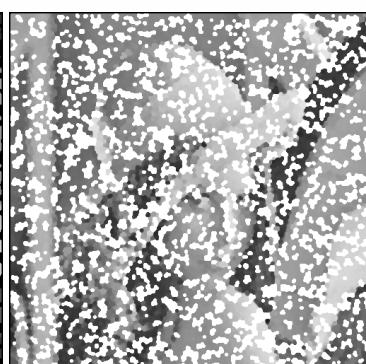

3x3 median filter
SNR = 14.913

5x5 median filter
SNR = 15.785

open then close
SNR = -2.300

close then open
SNR = -2.937

Salt-and-pepper noise image with probability 0.05

noisy image

SNR = 0.991

3x3 box filter

SNR = 9.501

5x5 box filter

SNR = 11.194

3x3 median filter

SNR = 19.266

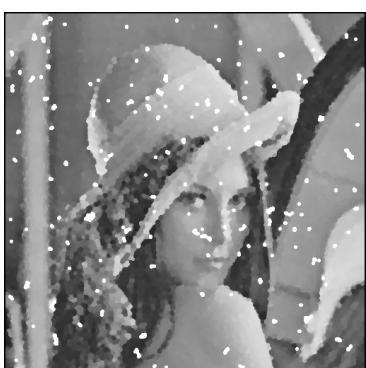

5x5 median filter

SNR = 16.358

open then close

SNR = 4.451

close then open

SNR = 4.014
